# NONSLIP PRODUCTS FOR A BROAD RANGE OF APPLICATIONS

Since 1974, Safemate Anti-Slip has provided quality non-slip walkway, non-slip stair and non-slip floor products to virtually every major industry sector.

A failure to provide an effective slip-resistant workplace or public area can not only cause serious injury or death, it can cost millions of dollars in lost revenue, fines, compensation payments and performance penalties.

For over 35 years, Safemate Anti-Slip has taken the time to learn the particular environmental and operating conditions of a range of industry sectors - dirt and moisture, chemical and organic waste, heavy traffic

and high impact zones - and have developed nonslip solutions to meet these challenges.

Operational, Maintenance and OH&S Managers have come to trust Safemate Anti-Slip to deliver effective and cost-efficient non-slip solutions to hazards caused by slippery walkways, floors and stairs.

Our products use only the highest quality antislip materials designed to provide durable, sanitary non-slip surfaces that comply with relevant regulatory standards throughout the world - all backed by a full 5 year factory warranty.
